COVID-19 Statement

Our approach

At Rotec, the safety and wellbeing of every employee, client and partner is our upmost priority. We recognise that this is an exceptionally challenging time for the construction industry – and that we must play our part to mitigate further transmission of the virus. We continue to monitor the COVID-19 situation closely, adhering to the latest government policy and industry guidelines.

We have taken steps to safeguard business continuity, ensuring no disruption to our service or product availability. The manufacturing of all our doors is continuing as normal.

Working on site

Government policy currently states that construction work may continue with sites remaining open.

All of our installation engineers will be briefed on the latest Site Operating Procedures (SOP). The latest SOPs can be found here: <https://www.constructionleadershipcouncil.co.uk/wp-content/uploads/2020/10/Site-Operating-Procedures-Version-6.pdf>

We will provide a set of RAMS (Risk Assessment Method Statements) prior to each project to ensure COVID-19 safety measures are adhered to.

Our office

All office-based employees, including our Sales and Maintenance Teams, are currently working from home where possible.

Contacting us

We continue to operate our standard working hours and can be contacted as normal. For all enquiries, please contact us via the following:
